Samah Abdulrahman Basoodan

AI Developer & Innovator | Al Khobar, Saudi Arabia
samah1basudan@gmail.com | +966 50 890 6437 | LinkedIn | GitHub | My Website

Professional Summary

AI researcher and Computer Science student with project experience across medical AI, multi-agent financial analysis, computer vision, environmental monitoring, and healthcare supply chains. Experienced in developing AI-driven concepts and prototypes using machine learning, deep learning, Python, Java, and YOLO. Four-year Toastmasters club president with strengths in public speaking, leadership, project coordination, and cross-functional innovation.

Education

Bachelor of Science in Computer Science | Saudi Electronic University 2024 – 2028

Semiconductors & Electronic Chip Design Fundamentals Program | KACST 2026

Artificial Intelligence Program | KAUST Academy 2024

Experience

Project Coordinator | Qeraty Library Mar 2025 | Al Khobar, KSA
- Coordinated project initiatives integrating culture with modern technologies.

President | Okadh Toastmasters Club, Ithra – Toastmasters International 2021 – 2025 | Al Khobar, KSA
- Led the club for four consecutive years, mentoring members and organizing regional public speaking events.

AI Research Trainee | KAUST Academy Dec 2024 | Al Khobar, KSA
- Applied data analysis and predictive modeling using advanced research tools and frameworks.

Key Projects

Stroke Sense | AI-Powered Early Stroke Detection & Prediction Ministry of Health & SDAIA
Developed an AI-based medical innovation for early stroke detection and prediction, submitted to and recognized by the Ministry of Health and SDAIA.

Ultra Investment | Multi-Agent Financial Statement Analysis Tuwaiq Academy
Designed a multi-agent AI system that automates corporate financial statement analysis to extract key performance indicators and investment insights.

Rafad Pump | AI-Supported Microneedle Sensor Device 6th Health Innovation Hackathon – KSAU-HS
Developed a microneedle sensor device concept for precise, automated delivery of cardiac clot (thrombosis) treatment doses.

ECOTECH | AI-Driven Desertification Monitoring & Mitigation KFUPM
Proposed an AI-based environmental solution to monitor desertification patterns and support land degradation mitigation strategies.

Breathing Project | AI Modeling Hackathon King Abdulaziz University
Developed a prototype lung cancer detection project using a microcontroller, deep learning, and machine learning to support early prediction.

AWS Medical Supply Chains | Cloud-Based AI Optimization AWS
Applied AI-driven forecasting to improve medical supply-chain efficiency and reduce shortages in healthcare logistics.

Skills

Technical Skills: Artificial Intelligence | Machine Learning | Deep Learning | Multi-Agent AI Systems | Computer Vision | YOLO | Predictive Modeling | Data Analysis | AI-Driven Forecasting | Financial Statement Analysis | Medical AI | Research & Prototyping | Python | Java | Microcontrollers | Cloud-Based AI Solutions

Soft Skills: Leadership | Strategic Communication | Public Speaking | Team Leadership | Mentoring | Project Management | Project Coordination | Event Organization | Presentation Skills | Cross-Functional Collaboration | Problem Solving | Critical Thinking | Decision-Making | Innovation | Adaptability | Time Management | Relationship Building

Awards & Certifications

- **2nd Place – Health Datathon:** Early Stroke Prediction Innovation | Ministry of Health & SDAIA
- **2nd Place – Regional Prepared Speech Competition** | Toastmasters International
- **Public Speaking Award – Regional Level** | Toastmasters International, 2024
- **Amd Hackathon Nominee** | Tuwaiq Academy & Alinma Bank; contributed to setting a Guinness World Record
- **Improving Deep Neural Networks** | DeepLearning.AI
- **Supervised Machine Learning: Regression** | IBM
- **Python Functions, Files, and Dictionaries** | University of Michigan

Languages

Arabic: Native | **English:** Advanced
